

Apple ID Student Sign in & Cloud Storage

Students now can get into their Apple ID & use their Cloud storage now

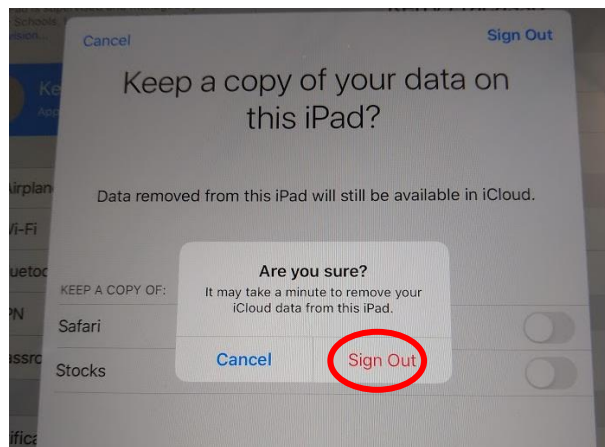

If students get a message popping up asking for them to put in their Apple ID password, then certainly try putting in their password on that screen. If that won't work, then the student will need to sign out of their Apple ID and then sign back into it. Here are the directions to sign out/in on their school Apple ID.

Settings  > Students Apple ID

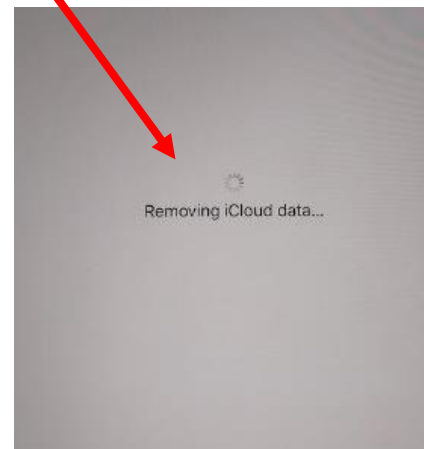

Click sign out

Click sign out again

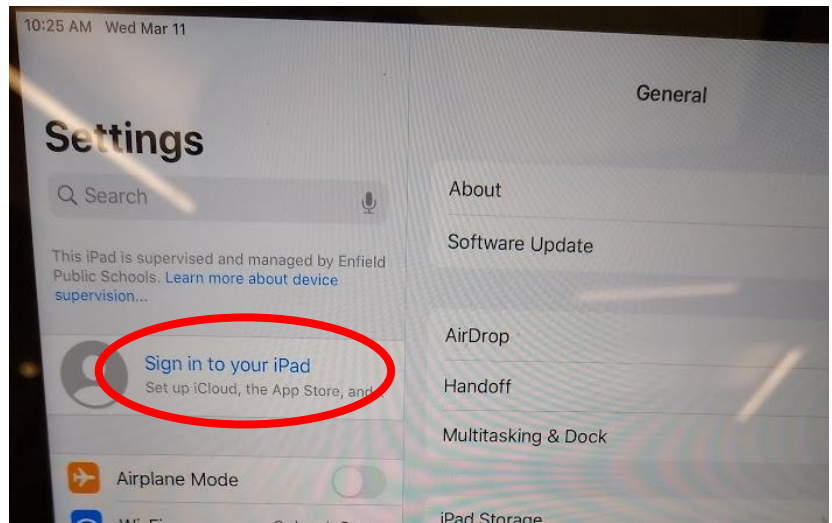

this happens

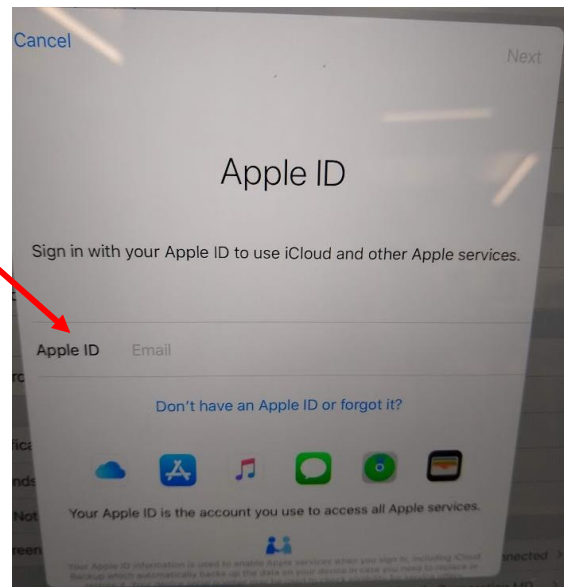

Once the student is signed out

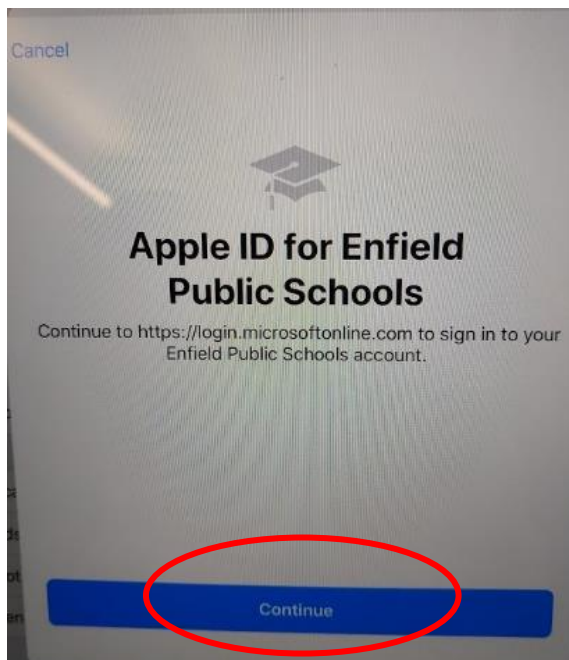

Click "Sign into your iPad"

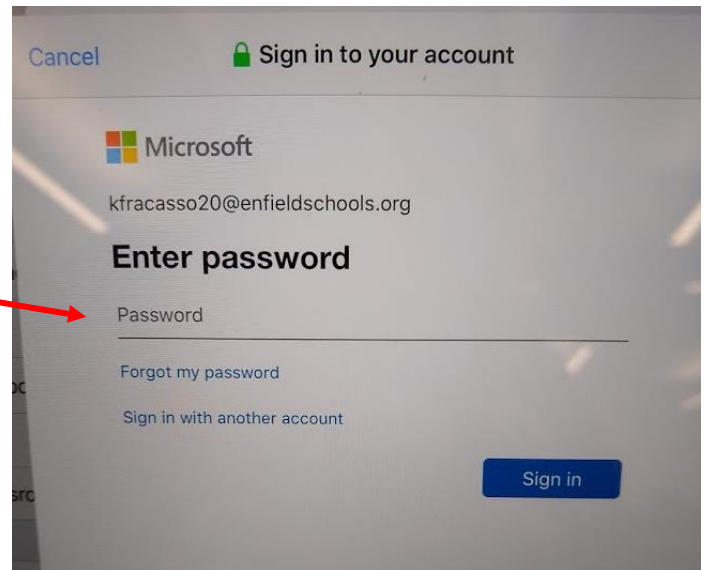

Students put in their school email for their Apple ID

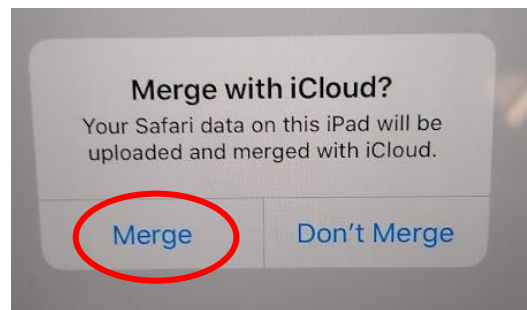

Click continue

Students put in their current Office 365 password when prompted

Click “Merge” so students don’t get two of everything

Students are now signed back into their Apple ID on their iPad

Turn on iCloud Drive/Storage

Go to Settings  > [your name (the Apple ID)] > iCloud, then toggle on iCloud Drive.
